AAFAQ AHMED

Senior Business Analyst / Requirements Analyst

Hyderabad, India | +91 90363 40786 | aafaq5455@gmail.com

PROFESSIONAL SUMMARY

Business Analysis professional with 10+ years of experience in software and technical documentation, requirements analysis, and cross-functional stakeholder collaboration. Skilled in translating product requirements into user stories, acceptance criteria, and technical specifications, using Jira and Azure DevOps for requirements traceability, change impact analysis, and Agile delivery. Experienced with SQL, Excel, Power BI, and AI-assisted analysis to support data-driven decisions and communication between business and technical teams.

CORE COMPETENCIES

- **Requirements Engineering:** Requirements Gathering & Elicitation, Gap Analysis, Scope Definition, User Stories, Acceptance Criteria (Given-When-Then), Business Requirements Documents (BRD), Functional Specifications.
- **Data & Process Analysis:** SQL Data Extraction, Excel (Pivot Tables/VLOOKUP), Power BI Dashboards, As-Is/To-Be Process Mapping, Flowcharting, Workflow Optimization.
- **Agile & Lifecycle Management:** Scrum Methodology, Jira, Azure DevOps (ADO), TFS, Version Control, Change Impact Analysis, Release Management.
- **Stakeholder & Risk Management:** Cross-functional Collaboration, SME Interviewing, Technical-to-Business Translation, Risk Assessment, Change Management.
- **Compliance & Governance:** Regulatory Requirements Analysis (US FDA, EU MDR), Quality Auditing, CAPA (Corrective and Preventive Actions).

TECHNICAL TOOLKIT

- **Management & Agile Tools:** Azure DevOps, Jira, TFS, Teamcenter, ClickUp, Microsoft Fabric.
- **Data & Analytics:** SQL, Excel, Power BI, Databricks (Basics).
- **AI-Assisted Analysis:** Claude, Positron, VS Code (Prompt Engineering for Requirements Analysis).
- **Enterprise Software:** SAP, FTP Deployment Systems.

PROFESSIONAL EXPERIENCE

Senior Business Analyst / Senior Technical Writer

Tungsten Automation, Hyderabad | Oct 2022 – Sep 2026

- **Requirements Management:** Managed functional and system requirements for 5 flagship enterprise products (including ReadSoft Invoices and TotalAgility) across 4 major Agile releases per quarter.
- **Agile Documentation:** Translated high-level Product Architecture Documents (PADs) and PRDs into actionable User Stories and strict Acceptance Criteria within Jira and Azure DevOps.
- **Traceability & Compliance:** Maintained end-to-end requirements traceability matrices (RTM) from initial business request down to development work items and final deployment specifications.
- **Process Optimization:** Performed AI-assisted impact analysis workflows using Claude and VS Code, cutting release scoping and change impact identification time significantly across all product lines.

- **Data-Driven Insights:** Extracted data via SQL and constructed Power BI dashboards and Excel analytics to provide product teams with visibility into release scope readiness and process bottleneck identification.
- **Stakeholder Alignment:** Facilitated regular refinement sessions with Product Managers, Lead Developers, and QA teams to resolve system ambiguities and secure stakeholder sign-off prior to production.

Technical Writer / Technical Publications Specialist

L&T Technology Services, Bangalore | Mar 2014 – Sep 2022

Software and Aerospace: Android OS, Aerospace Software

- Gathered and validated requirements from software engineers and SMEs to produce aircraft and engine manuals and Android OS documentation for every release.
- Authored the technical data guide for a new aerospace software product to aerospace and regulatory standards; raised team quality through peer reviews and QA.

Medical Devices: Beta Bionics, Hologic, Honeywell (3 clients, US and EU markets)

- Analyzed US FDA and EU MDR requirements to deliver compliant manuals, addenda, and device labels for 3 client accounts.
- Conducted internal quality audits against management plans, reporting non-conformances with CAPA recommendations; built reusable templates that sped up delivery for new customer requirements.

Aerospace: Airbus Technical Illustration (AKKA, Alstom)

- Interpreted Airbus engineering drawings and customer review feedback to deliver illustrations for 6 publication types (IPC, IPL, AMM, SB, SRM, CMM) across 5 aircraft families (LR, SA, MB, WB, XWB).
- Managed the illustration lifecycle end to end in SAP, from sourcing to customer review and release, self-checking against Airbus TDS/TDG; added metadata and interlinking so technicians could reach troubleshooting content faster.

Rail: Harsco Rail

Created and maintained Operations and Maintenance Manuals for rail maintenance equipment, working from engineering input and SME reviews.

EDUCATION & CERTIFICATIONS

- Certification: Introduction to Business Analysis | Coursera
- Certification: API Technical Writing (JSON & XML) | Udemy
- MBA in Information Systems | Sikkim Manipal University (2014)
- B.Tech in Aeronautical Engineering | Rajasthan Vidyapeeth University (2009)
